

Team Meetings

Date: January 26th, 2022

Attendees:

Owen Spicker

Jivraj Grewal

Hassan Brar

Michael Bartinski

Absent:

1. Project

Progress

- What we worked on this week.
 - Geocode API
 - Journal entry feature
 - Email verification
 - Project presentation for the TA on Friday
- Organize by task/activity.
 - Geocode API
 - Journal entry feature
 - Email verification
- Name which students worked on each task/activity.
 - Implemented the Geocoding API. Some of the locations are now returned as lat/long coordinates in preparation for the Google Maps API. Worked on by Owen
 - Started work on the functionality of the journal part of the website. Currently it does not save to the database. Worked on by Hassan
 - Still waiting for a reply from the previous group on the booking system so will be helping Hassan with the journal part of the website - Worked on by Jivraj.
 - Worked on email verification. Email will be sent out on a simpler version of our create account page. Worked on by Michael.

Blockers + Surprises

- Things that impeded progress this week.
 - The journal entries are not being saved to the backend.
 - The previous group hasn't replied to the clients email on how to fix the booking system.
 - Password and password confirmation won't work together when rebuilding the create account page
- Things that came up or were discovered that you didn't expect.
- Possible resolution strategies for moving forward.
 - Some of the addresses in the seed data cannot be geocoded as the addresses do not exist. It throws errors. Will check to see if an error code exists when geocoding. If so, then those healers will not be mapped.

- The journal entries database will be redesigned in hope that it will soon save the users entries.
- Will be putting a pause on the booking system for now and focusing on other issues with the code
-

2. Learning Activity

- Summary of your team's learning activity for the week.
- Name which students worked on it.
 - Implementing Geocode API, looking ahead to Maps API. By Owen
 - Redesign and understand the new backend for Journal entries. By Hassan
 - Try and help debug issue with the entries of the journals. By Jivraj.

3. Plan

"Plans are worthless, but planning is everything."

Task for this week:

- What we worked on this week.
 - Geocode API errors.
 - Journal entries backend
- Organize by task/activity.
 - Geocode API errors.
 - Journal entries backend
- Name which students worked on each task/activity.
 - Going to work on how to resolve the geocoding errors when addresses do not exist. Also will look ahead to how I will be able to get markers to display once the Map is rendered on the page. By Owen.
 - Going to try and solve the problem of the journal entries not being saved to the backend. By Hassan.
 - Try to debug with hassan on the journal entries features. By Jivraj

Learning activities proposed for this week:

1. Find a solution to geocoding issue
2. Solve the issues with the journal entries.
3. Fix password and password confirmation

Goals for the next milestone:

1. Have some functionality with the booking code in our project.
2. Location search and mapped healers.
3. Try and save journal entries.

4. Create account with email verification
