

Team Meetings

Date: Feb 14 2022

Attendees:

Owen Spicker

Jivraj Grewal

Hassan Brar

Michael Bartinski

Absent:

1. Project

Progress

- What we worked on this week.
 - Maps API
 - Booking seed data
 - Usability tasks
 - Email Verification
- Organize by task/activity.
 1. Maps API
 2. Booking Seed Data
 3. Usability tasks
 4. Email verification
- Name which students worked on each task/activity.
 - Worked out the bugs and finished up the Google Map API. Worked with other group members to make sure the Map was working properly on their devices. By Owen
 - Looked into the booking system and it is functional, just need to tweak some of the seed data to test it. By Hassan and Jiv
 - Found a node package designed to send emails, which should work better than using firebase's methods. By Mikey
 - List out usability tasks. By everyone

Blockers + Surprises

- Things that impeded progress this week.
- Things that came up or were discovered that you didn't expect.
 - Worked with other group members to see how the seed data will make the booking system somewhat functional.
 - Firebases email methods don't cooperate with the site's local database/user creation
- Possible resolution strategies for moving forward.
 - Seed data was very buggy and still needs some tweaking

2. Learning Activity

- Summary of your team's learning activity for the week.
- Name which students worked on it.

3. Plan

"Plans are worthless, but planning is everything."

Task for this week:

- What we worked on this week.
 - Maps API
 - Booking seed data
 - Email verification
 - Usability task list.
- Organize by task/activity.
 1. Maps API
 2. Booking seed data
 3. Email verification
 4. Usability task list.
- Name which students worked on each task/activity.

Learning activities proposed for this week:

- Come up with different user tasks related to the location search and Google Map API in preparation for peer testing. Will start looking at getting the journal part of the website working. By Owen
- Will fix the seed data and fully test the booking system to see if any bugs occur. By Hassan and Jiv
- Research Nodemailer. By Mikey
- Create usability tasks for the project. By everyone.

Goals for the next milestone:

1. Have some functionality with the booking code in our project.
2. Location search and mapped healers.
3. Try and save journal entries.
4. Create account with email verification
5. Have a plan for the new booking system and ask client for opinion on it
