

Team Meetings

Date: Feb 7 2022

Attendees:

Owen Spicker

Jivraj Grewal

Hassan Brar

Michael Bartinski

Absent:

1. Project

Progress

- What we worked on this week.
 - Maps API
 - Booking system
 - Email system
- Organize by task/activity.
 - 1) Maps API
 - 2) Booking System
 - 3) Email system
- Name which students worked on each task/activity.
 - Worked on getting the Maps API working. The map will render with markers, which have onclick events that link to the associated healer. However the map is buggy right now and does not work every time. Worked on by Owen
 - Talked to the client about the booking system issues and she would like the previously made booking system to be tested and if we can not get it working then we may make a new booking system for the website. The journal has been put on hold. Worked on by Hassan
 - Help Hassan with the booking system and debug the current system, if there is no progress help out with the new design and layout. Worked on by Jivraj
 - Found a new part of the website to add email code too. Worked on by Michael

Blockers + Surprises

- Things that impeded progress this week.
 - Bugs in Map function
 - Time slots on the booking file.
 - New error with email code
- Things that came up or were discovered that you didn't expect.
- Possible resolution strategies for moving forward.
 - Different team members have reported separate bugs surrounding the Maps API. Work with the other team members with the bugs they are getting related to the Maps API to try and get it to consistently work every time.
 - The previous booking system is still not showing the time slots.

- Previous booking system not working in conjunction with its back end file.

2. Learning Activity

- Summary of your team's learning activity for the week.
 - Map API
 - Booking System
- Name which students worked on it.
 - Finding ways to implement onclick events on the Map API. By Owen
 - Create and plan out a new booking system. By Hassan

3. Plan

"Plans are worthless, but planning is everything."

Task for this week:

- What we worked on this week.
 - Maps API
 - Booking system frontend/backend
- Organize by task/activity.
 - 1) Maps API
 - 2) Booking System
- Name which students worked on each task/activity.
 - Work with the other team members to try and resolve bugs surrounding the Maps API. By Owen
 - Plan out how to create a new booking system with a functioning backend. By Hassan

Learning activities proposed for this week:

Goals for the next milestone:

1. Have some functionality with the booking code in our project.
2. Location search and mapped healers.
3. Try and save journal entries.
4. Create account with email verification
5. Have a plan for the new booking system and ask client for opinion on it
